

# INDUSTRIAL STRENGTH

Heavy-duty cleaning made simple—  
from shop floors to building exteriors.

## MULTI-USE INDUSTRIAL SOLUTIONS

Industrial environments collect heavy soils—grease, hydraulic fluid, carbon buildup, and more. Super Blast Off keeps facilities, machinery, and work surfaces clean between maintenance cycles. Dilute for use in pressure washers, floor scrubbers, or strippers to cut through layers of oil and industrial residue. Apply to equipment, workbenches, and fabrication areas, agitate, and rinse clean.

For heavy machinery and shop floors, use with a brush, degreasing wand, or mop to restore surfaces and maintain a safe, professional workspace.

## ONE SOLUTION. EVERY SURFACE.

Industrial environments collect heavy soils—grease, hydraulic fluid, carbon buildup, and industrial residue. Super Blast Off keeps facilities, machinery, and work surfaces clean between maintenance cycles with a powerful, industrial-strength formula trusted for decades.

Dilute for use in pressure washers, floor scrubbers, or strippers to cut through layers of oil and grime, or apply directly to equipment, workbenches, fabrication areas, and shop floors. Agitate with a brush, degreasing wand, or mop, then rinse clean to restore surfaces and maintain a safe, professional workspace.

Super Blast Off is equally effective on building exteriors, removing rust streaks, environmental buildup, oil stains in parking areas, and grime from siding, doors, and walkways. Inside your facility, it delivers the same professional-grade results on floors, walls, countertops, restrooms, break rooms, and high-touch surfaces.

From warehouse floors and shop walls to heavy machinery, tools, and production areas, Super Blast Off delivers consistent, reliable performance across your entire operation—there's virtually nothing this industrial-strength cleaner can't tackle.
